

Company Profile

Established: 2020

Core Focus: Deliverydevs specializes in providing scalable, secure, and resilient software solutions, emphasizing collaboration and innovation. We aim to empower businesses through technology and maintain transparency in our processes.

Mission

To create ease and simplicity in the lives of those who entrust us with their challenges by providing realistic, technology-enabled solutions.

Vision

To deliver excellence, every time.

Values

Core Values

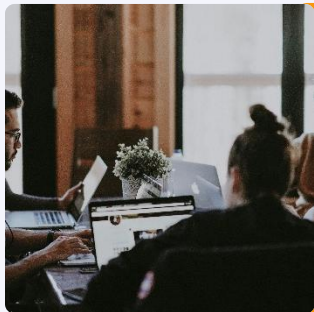

Collaboration:

Encouraging teamwork and innovation

Integrity:

Maintaining transparency and ethical practices.

Excellence:

Prioritizing quality and innovation in every project

Harmony:

Promoting harmony at work between all our employees

MESSAGE

CEO Message

“At Deliverydevs, we’re fueled by a passion for innovation and excellence. As we continue to grow, our commitment to delivering impactful solutions and building meaningful relationships stays at the heart of everything we do. Our team is what makes us great, and together, we’re shaping the future of tech services. Thank you for being part of our journey—let’s keep pushing boundaries and achieving amazing things, one delivery at a time.”

– **Ebrahim Tiwana**

Leaderships' Message

"At Deliverydevs, collaboration and creativity drive our mission to solve complex challenges. From the start, transparency has been our cornerstone, fostering trust and ensuring clients are part of every step we take together. We are committed to delivering not just projects but transformative solutions that set new standards of excellence. With a passionate team and a shared vision, I am excited about the journey ahead as we continue to grow, innovate, and exceed expectations. Here's to building a future defined by trust, innovation, and exceptional results.."

- Basil Muqtadir, Co-Founder & CFO

"From the very beginning, Deliverydevs has been driven by a simple mission: delivering real, measurable value through innovative and scalable tech solutions. What excites me most is our ability to evolve, adapt, and push the boundaries of what's possible. We're more than a team—we're a family, and together, we're building a future filled with opportunities and success. Thank you for being part of this incredible journey. "

- Ahmed Faraz, Co-Founder & CTO

SERVICES

Services We Offer

**Web Development**

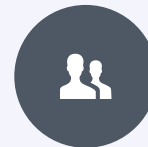

We offer a comprehensive set of web development services to ensure our client's success in the digital landscape. We have dedicated developers, designers, and strategists who have hands-on experience in their respective fields, ensuring exceptional results for your business.

**Cyber Security**

From cybersecurity monitoring to malware protection, our offerings encompass a broad spectrum of solutions aimed at fortifying your digital defenses. With our information security measures, we ensure the confidentiality and integrity of your sensitive data, while our network security services safeguard your infrastructure against unauthorized access. Additionally, we offer Identity and Access Management (IAM), Threat Intelligence (SIEM), Data Loss Prevention (DLP), and others. So, with Deliverydevs, you can trust in robust cybersecurity measures designed to keep your organization secure.

**DevOps**

Change how your company delivers software by collaborating with our cross-functional teams and accredited DevOps experts. We can help you at every stage, from strategy design and DevOps evaluation to end-to-end installment. Deliver consistent results. Engage in real-time collaboration. Enhance your workflows.

**Staff Augmentation**

Reliable IT staff augmentation services offer a flexible augmentation solution that bridges your talent gaps with highly skilled and qualified professionals. We work as an extension of your HR team, sourcing the ideal temporary talent to meet your project requirements. This enables you to quickly scale your workforce up or down, saving time and money over traditional hiring processes while increasing your team's expertise and productivity.

SOLUTIONS

Solutions We Offer

SaaS Development

Empower your business with Deliverydevs' scalable, subscription-based SaaS solutions—cost-effective, always updated, and ready to grow with you.

Application Modernization

We transform outdated legacy systems into modern, future-ready solutions, redesigning apps to meet today's digital demands.

Mobile & Web App Development

We are a full-service mobile & web app development company specializing in creating outstanding applications for smartphones, tablets, and even devices powered by a digital assistant.

Project Management

Struggling with software project delays, budget overruns, or communication gaps? Deliverydevs excels in comprehensive project management, ensuring your projects succeed in today's complex IT landscape.

IoT Solutions

Accelerate your business with Deliverydevs' secure IoT solutions, from industrial applications to smart cities and wearables, designed for efficiency, real-time insights, and scalable platforms.

Machine Learning

We offer predictive analytics, image recognition, and natural language processing (NLP) to leverage cutting-edge machine learning tools, empowering strategic decision-making and maintaining a competitive edge.

API Development

We specialize in custom APIs for seamless data exchange, platform integration, and enhanced software performance.

Artificial Intelligence Solutions

Our AI solutions help organizations turn complex operations into intelligent, scalable systems. We design and deploy custom, agentic AI solutions that integrate seamlessly with existing infrastructure while meeting enterprise standards for performance, security, and scalability. From intelligent automation and NLP to computer vision and end-to-end AI product development, Deliverydevs delivers production-ready AI built to drive real business impact..

PRODUCTS

ERP Solutions

Streamline your business operations with Deliverydevs' expert ERP solutions tailored to meet your unique needs. Our team specializes in designing and implementing integrated systems that unify processes, enhance data transparency, and improve operational efficiency across all departments. From finance and inventory to human resources and customer relationship management, our solutions ensure seamless connectivity and optimal performance. Let us help you build a smarter, more connected enterprise that drives productivity and empowers growth.

**Odoo**

Deliverydevs proudly partners with Odoo, a versatile open-source ERP platform known for its modular design and user-friendly interface. Leveraging Odoo's flexibility, we deliver tailored, scalable solutions that streamline operations, enhance productivity, and adapt to diverse business needs..

The ERPNext logo is displayed in blue text on a white background.**ERPNext**

Deliverydevs proudly partners with ERPNext, a leading open-source cloud ERP platform. With expertise in cloud-based ERP, we deliver scalable, cost-effective systems and tailored solutions to meet unique business needs.

PRODUCTS

IoT Solutions

Maximize Efficiency with IoT

- Connect your tracking devices for seamless data flow.
- Optimize routes and automate tasks for increased productivity.
- Proactively address potential delays and disruptions.

IoT Hardware Expertise:

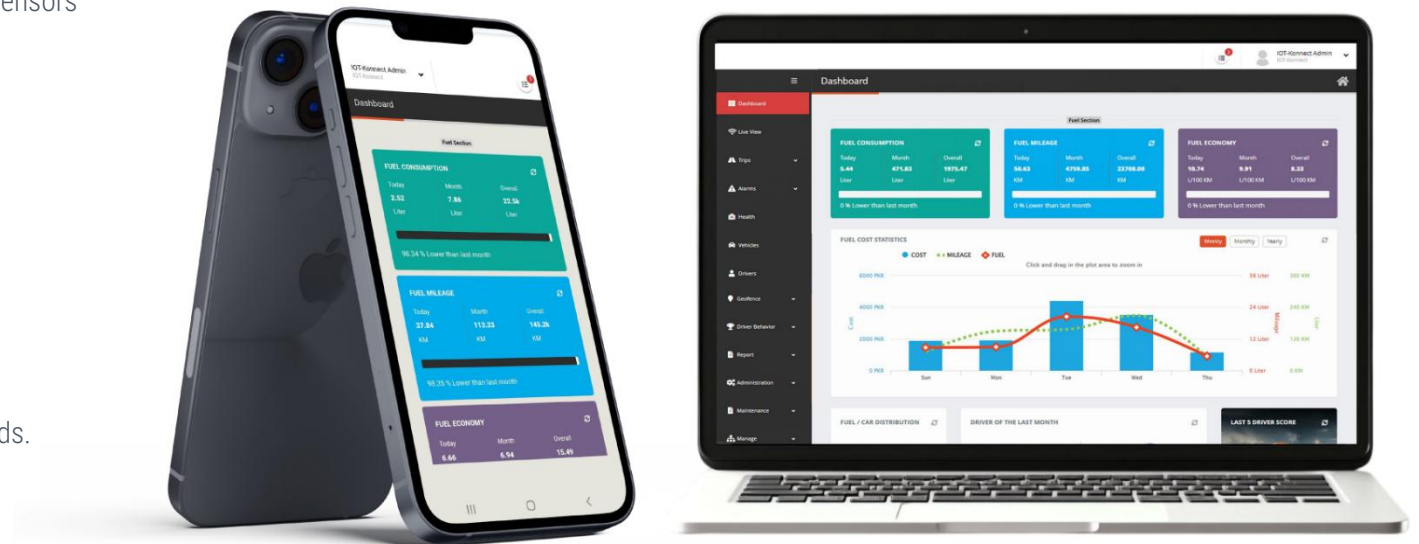

- We recommend the right hardware for YOU. GPS trackers, OBD devices, sensors and more. Selection, installation, and maintenance of reliable hardware.

Telematics:

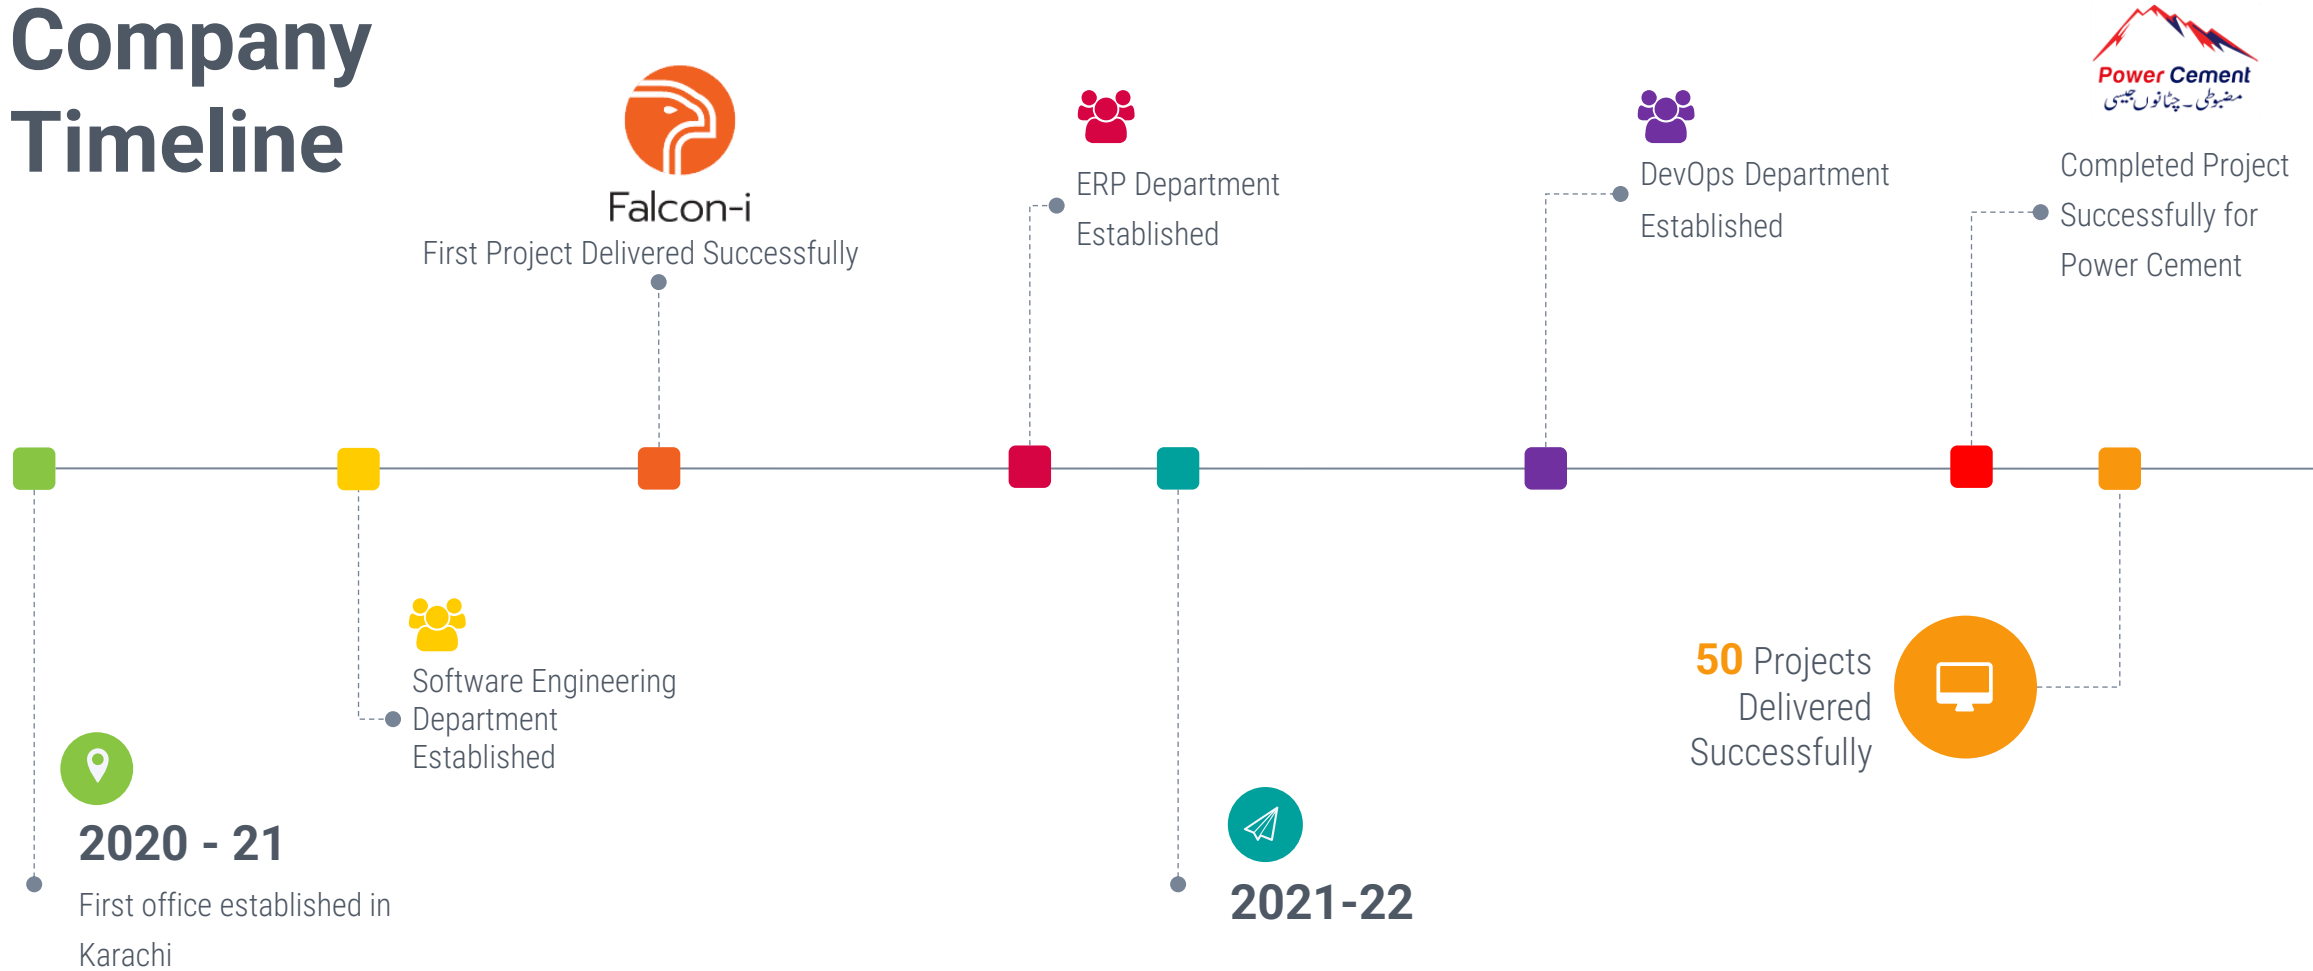

- Gather and analyze vehicle data for improved fleet management.
- Optimize routes, monitor driver behavior, and reduce fuel costs.

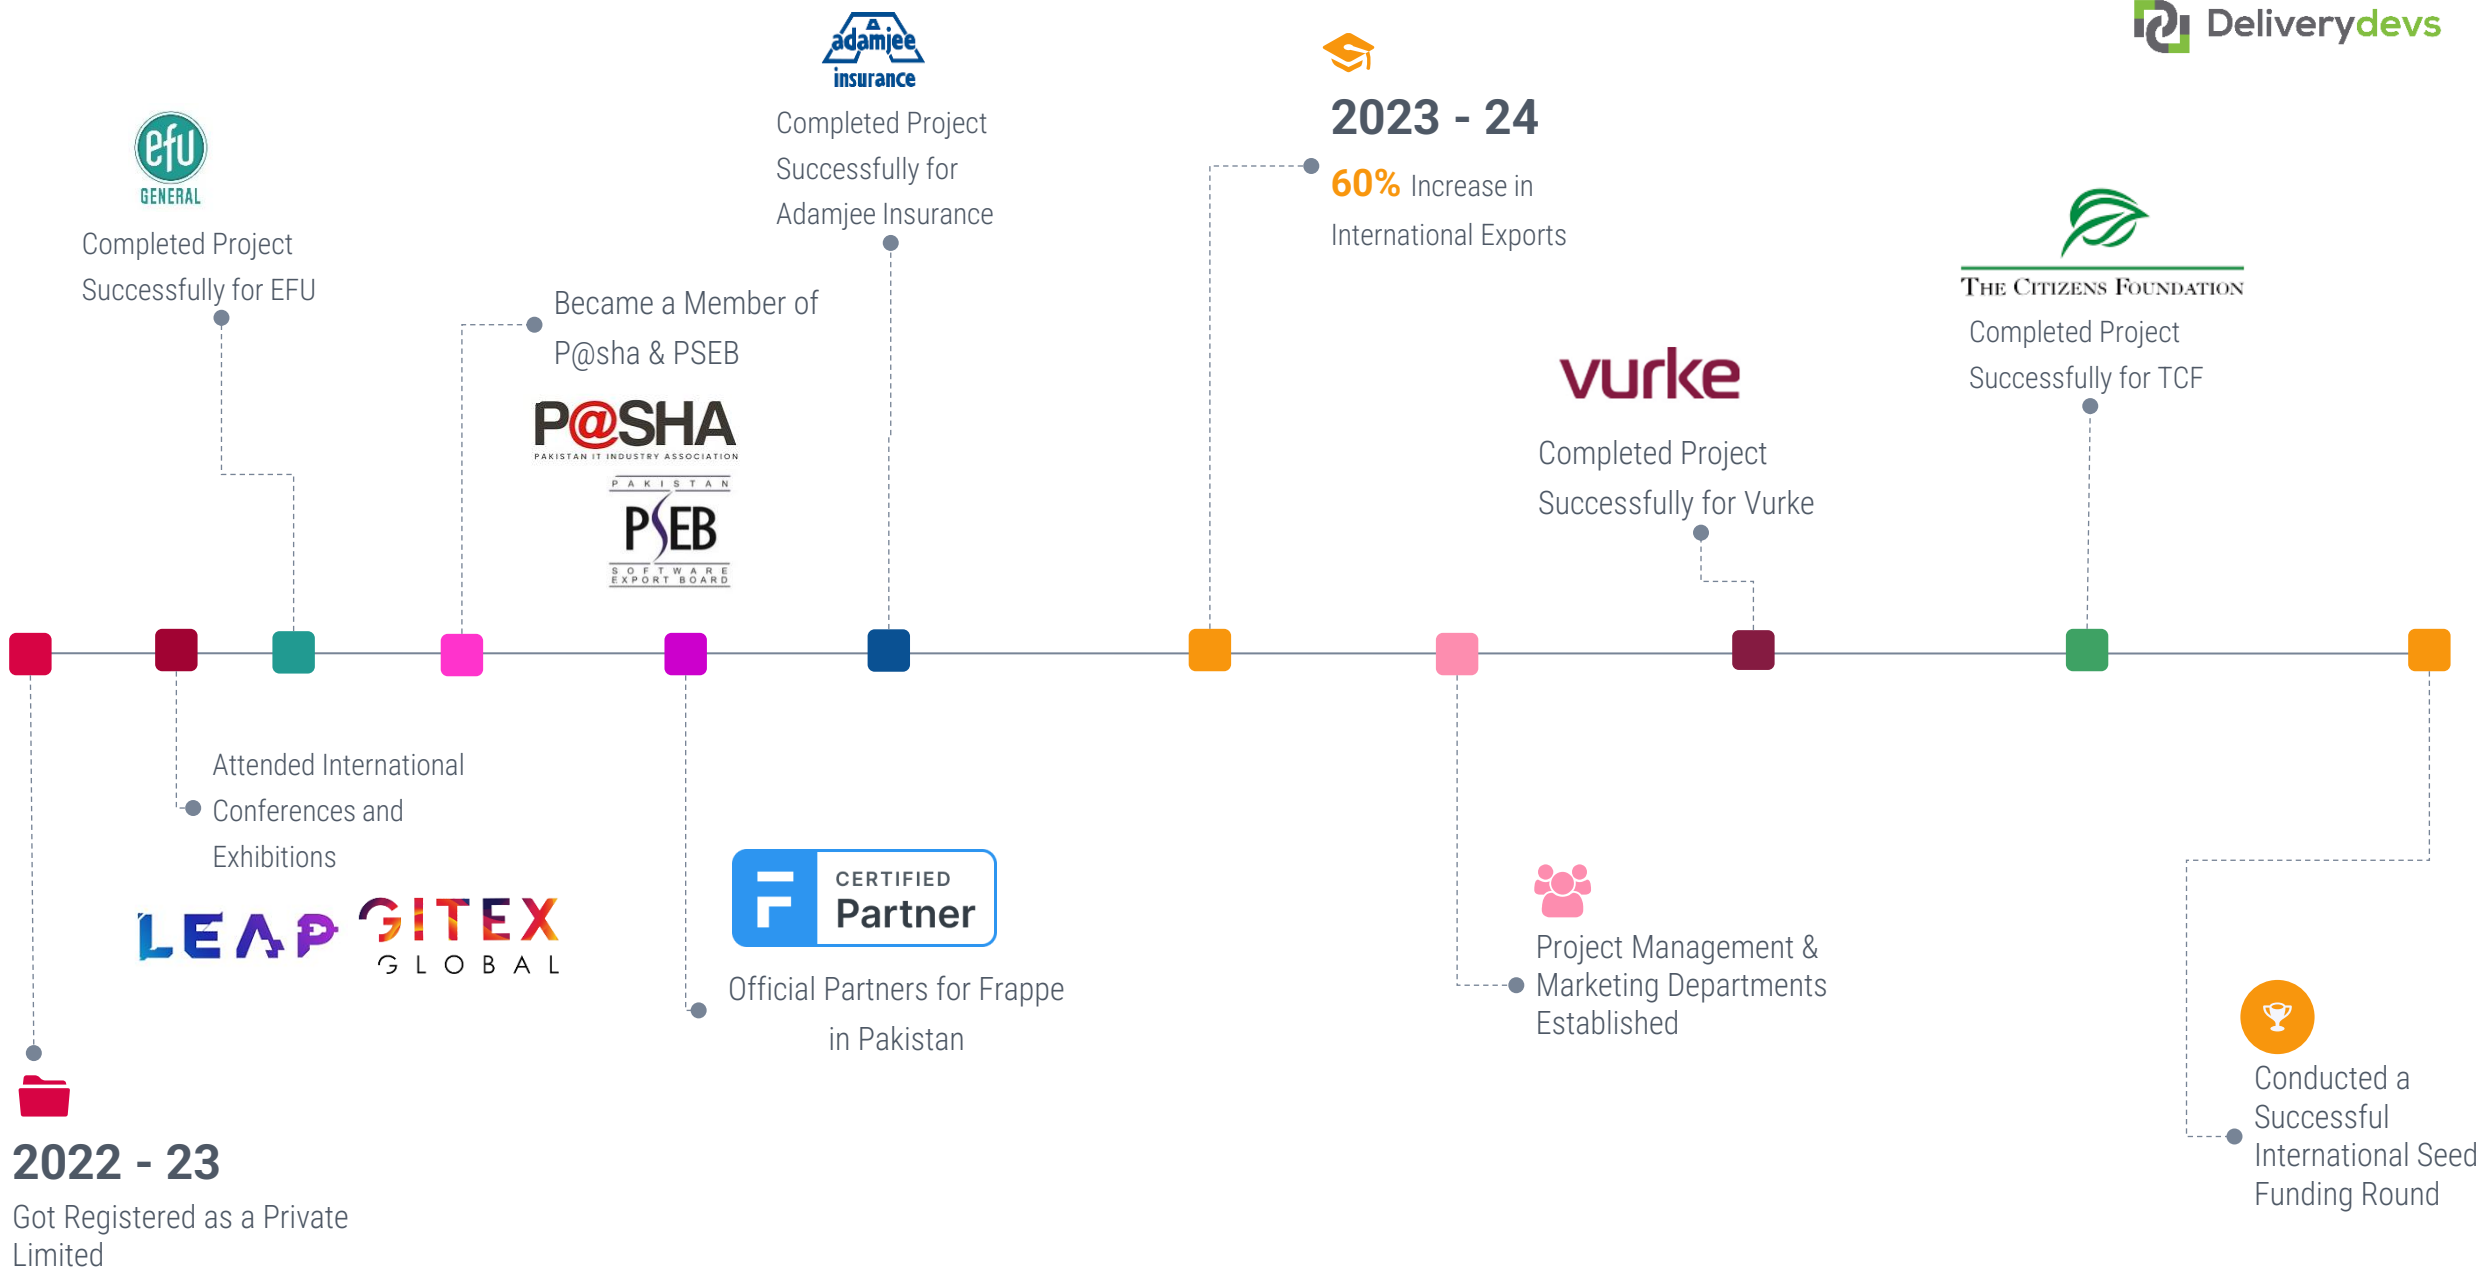

Why Choose Deliverydevs?

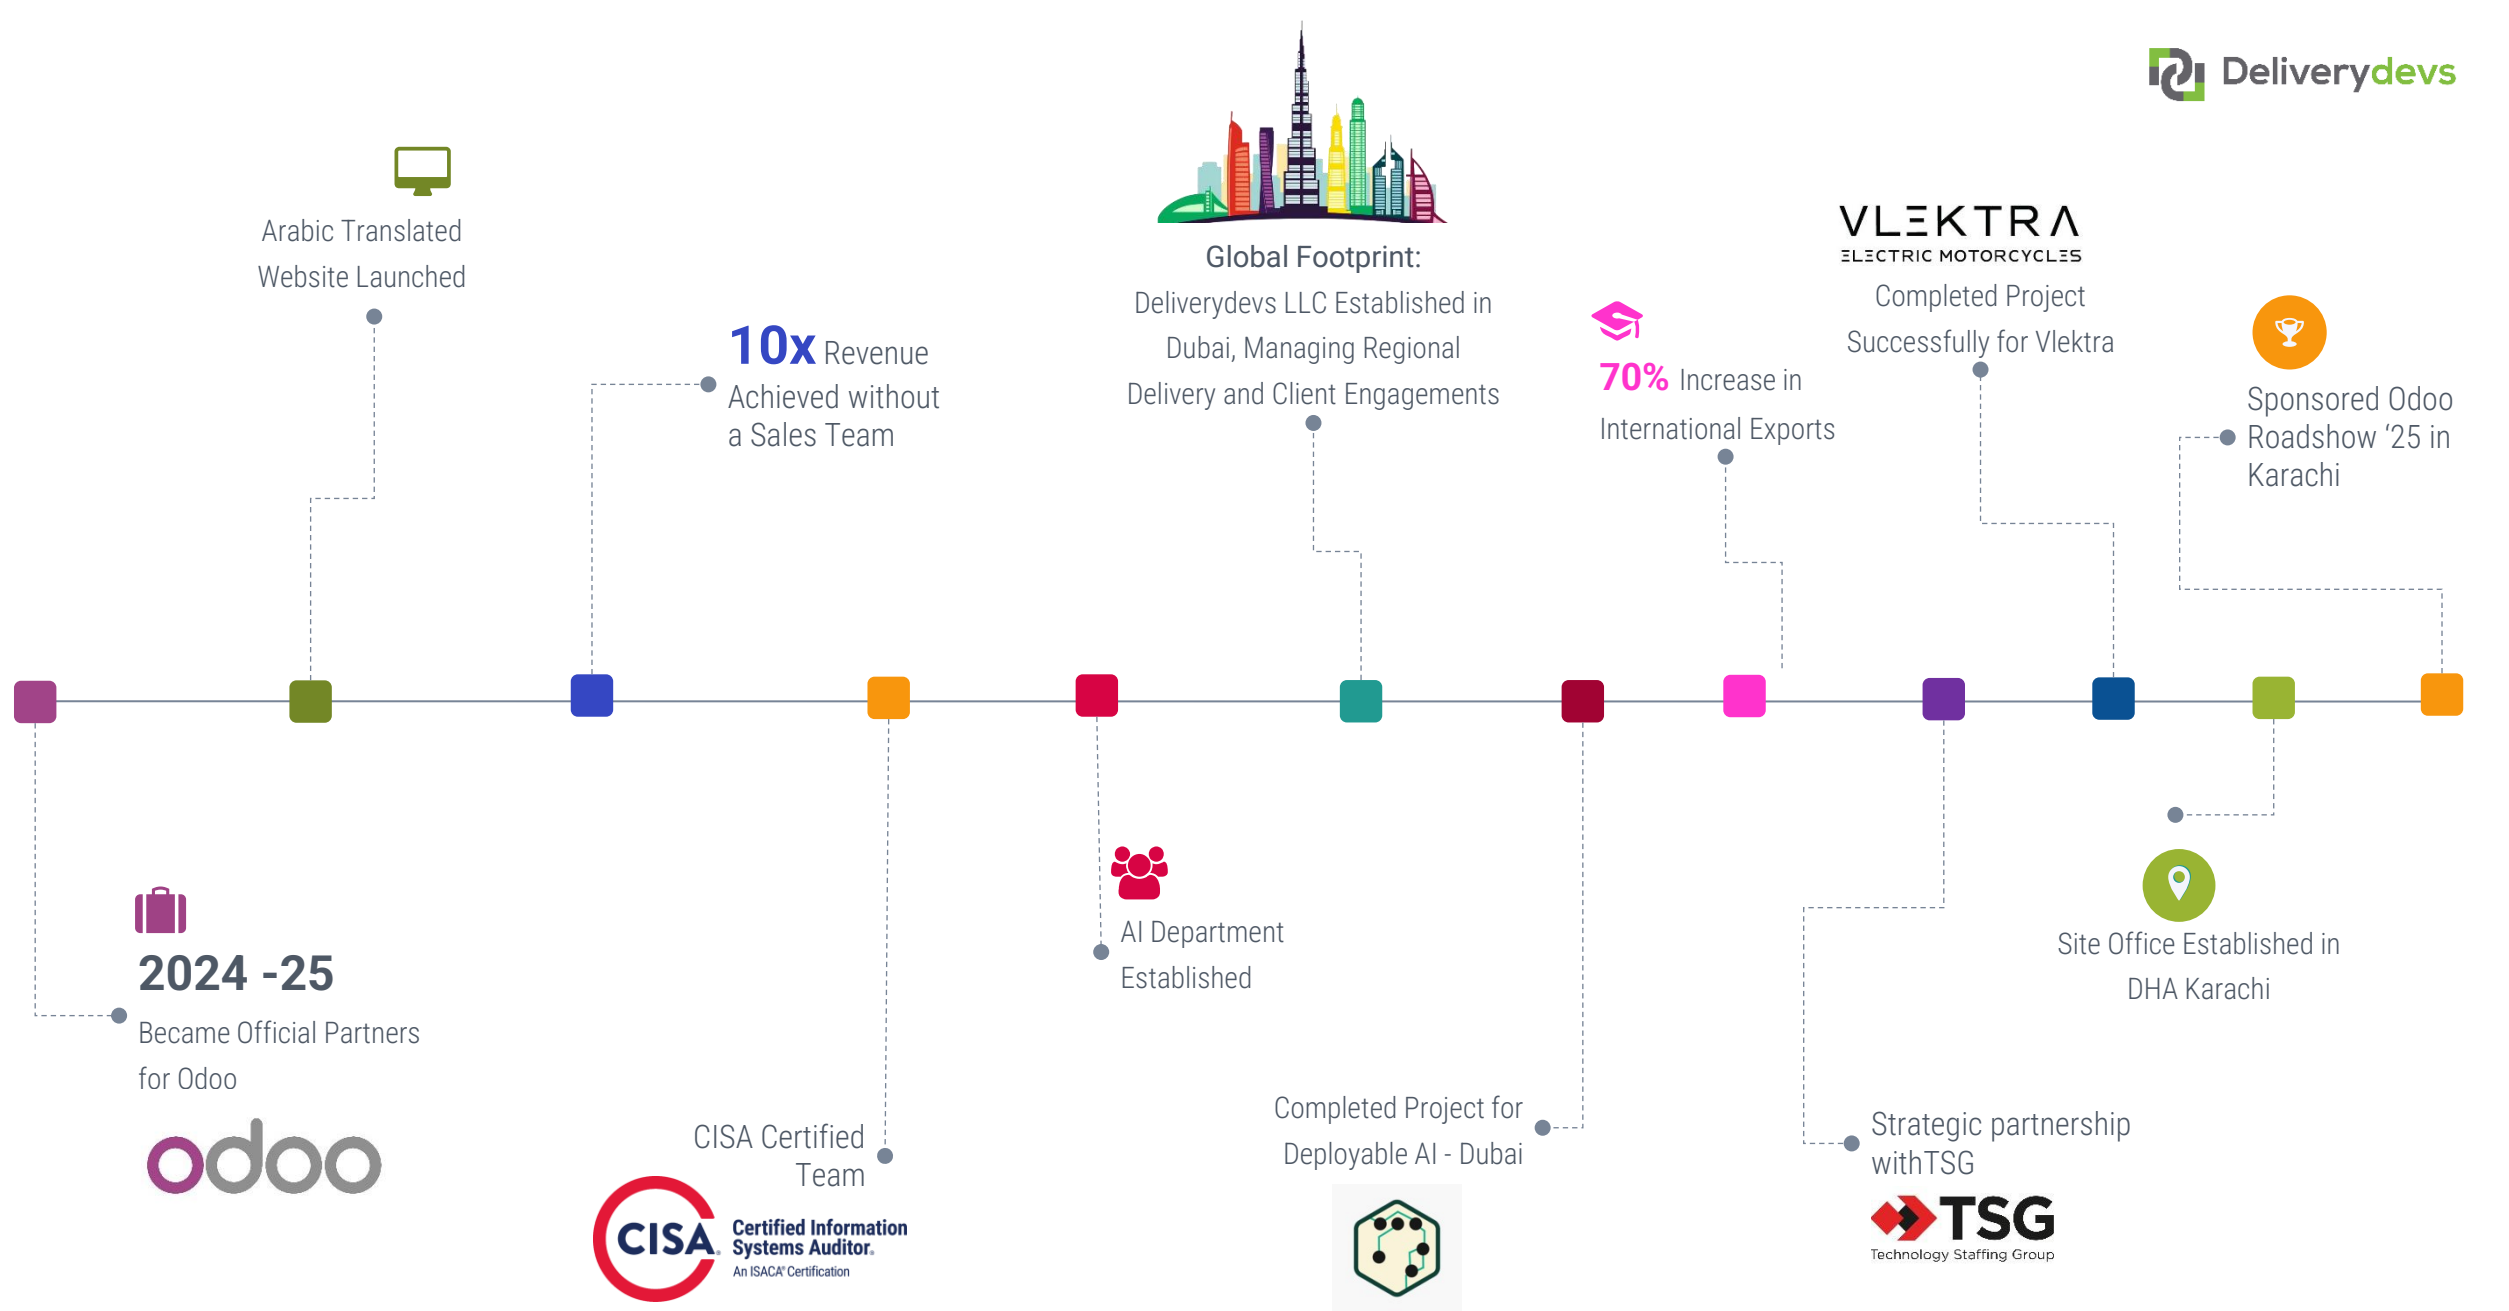

- **40+ Years** of Combined Team Experience.
- End-to-end solutions: hardware + software custom solutions for your needs.
- Dedicated Support for Your Success.

- UK
- Bahrain
- Africa

100+ active clients with an average relationship of over 4 years. And a **96%** retention rate.

CASE STUDY

Falcon-i Mob App, Website & ERP Development

Deliverydevs developed advanced software solutions, enhancing asset-tracking across web and mobile platforms, ensuring seamless integration with existing systems and improving performance for customer service.

We provided a cross-domain solution, delivering a software product optimized for web and mobile (Android/iOS) platforms. This software enables real-time asset tracking and integrates smoothly with existing systems via robust APIs.

The solution utilizes MSSQL with Master-Slave Replication, .NET MVC/Core, Java, Kotlin, Swift, Firebase for push notifications, Agile/CI/CD practices, GitLab for version control, CubeDesk for management, and Kubernetes, Docker, Google Maps, Analytics, and Tag Manager for additional tools..

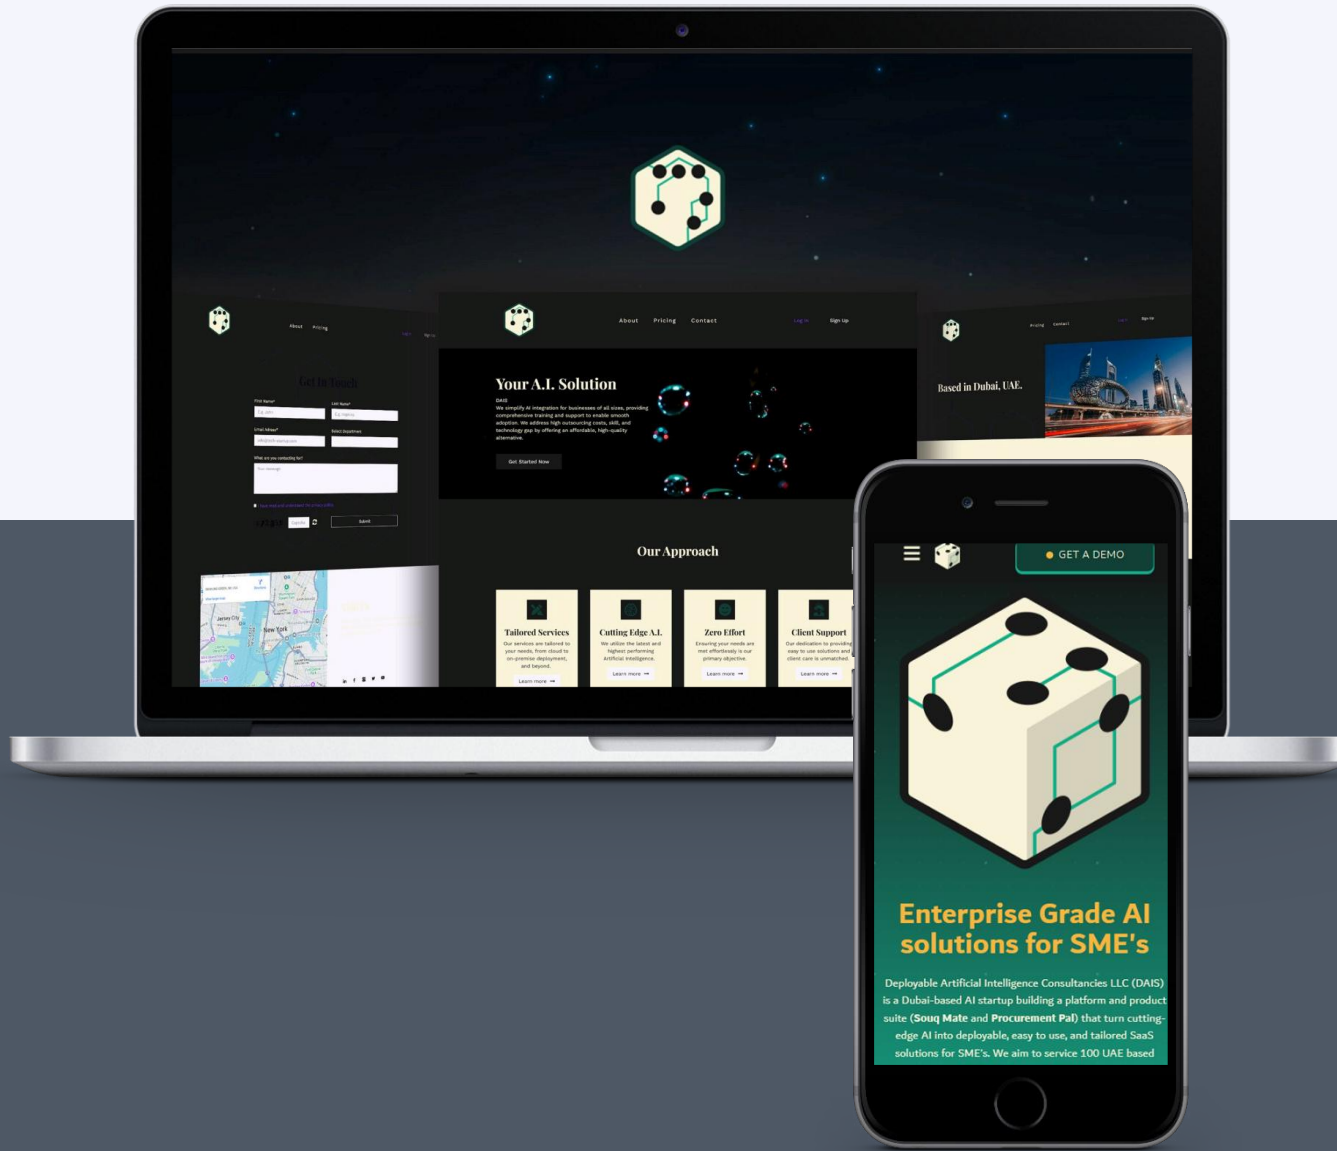

CASE STUDY

Power Cement Operational Resilience & Security Enhancement

Power Cement partnered with Deliverydevs to enhance operational resilience by addressing challenges in business continuity, disaster preparedness, fault tolerance, security, and data replication through tailored IT solutions.

- ✓ Operational Resilience: Deliverydevs enhanced Power Cement's continuity with tailored BCP, fault tolerance, contingency planning, proactive risk mitigation, and Zabbix-based monitoring to ensure seamless operations and rapid recovery.
- ✓ Security and Compliance: Deliverydevs improved Power Cement's security posture with CIS Benchmarks-compliant measures, proactive monitoring, and custom disaster response plans, ensuring robust threat protection and preparedness.

CASE STUDY

Deployable Ai Consultancies AI-Powered Customer Service Platform

Deployable Artificial Intelligence Consultancies L.L.C. (DAIS) is an AI solutions provider enabling SMEs to enhance customer engagement and operational efficiency through accessible, scalable AI-powered platforms.

Challenges faced by DAIS:

- Limited scalability in customer support operations
- High dependency on manual customer interactions
- Lack of real-time system integration across channels
- Ensuring reliable performance under growing user demand

Tailored Features Implemented:

- AI-powered chatbot for automated customer interactions
- Multi-channel integration (WhatsApp and social platforms)
- Backend system integration with CRM, product catalog, and order management
- Scalable cloud infrastructure with monitoring and automated scaling

CASE STUDY

EFU General Oracle APEX Migration & UI/UX Enhancement

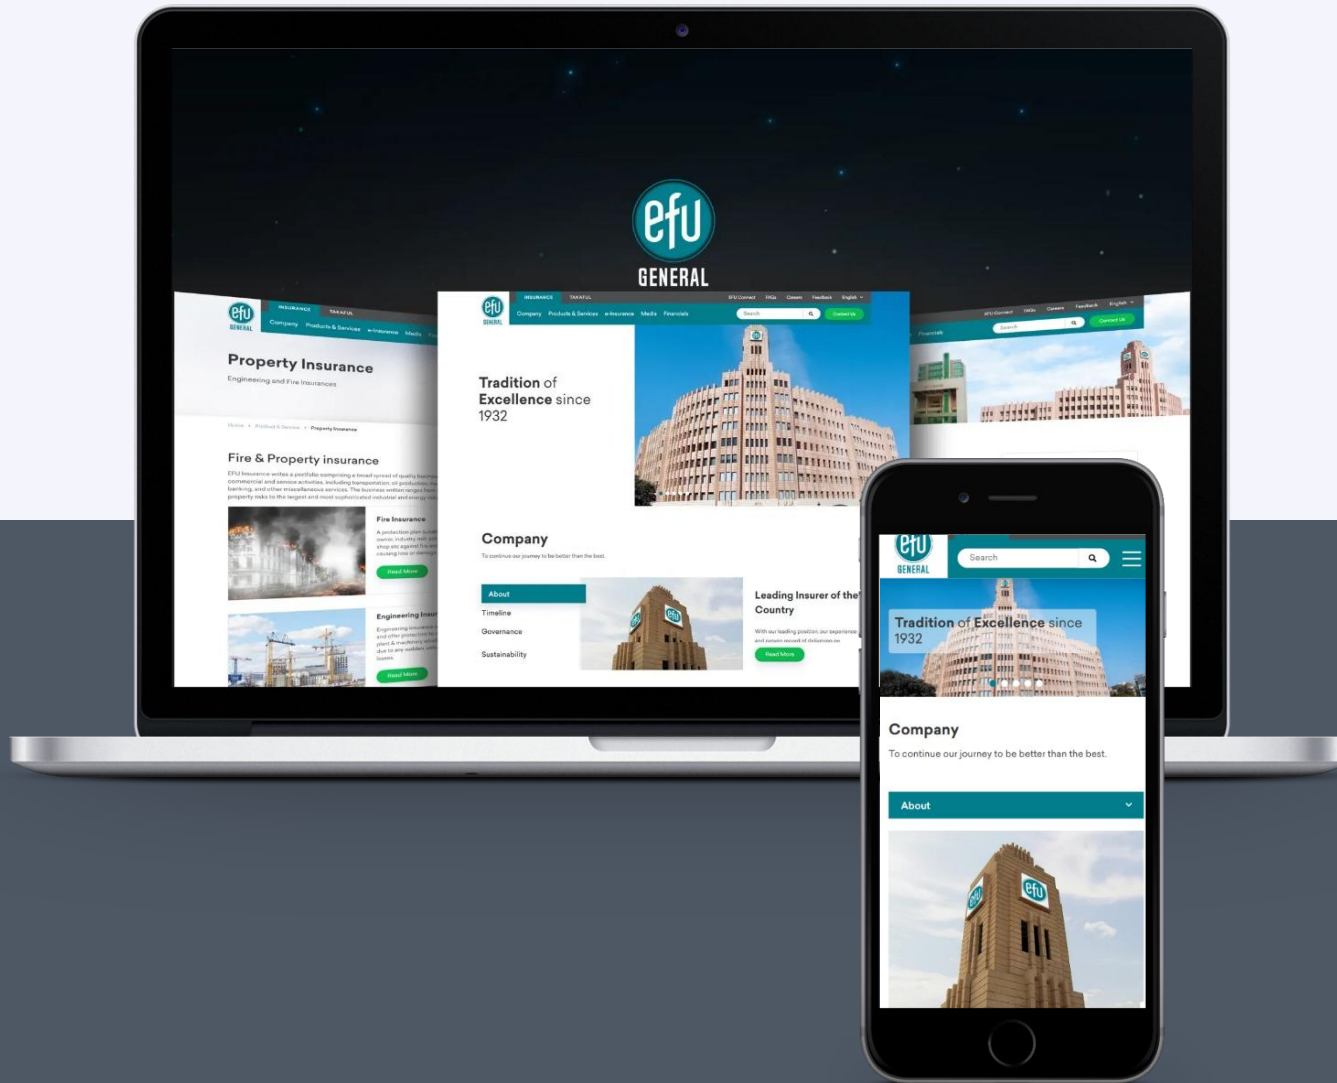

EFU General Insurance faced challenges migrating from Oracle Forms to Oracle APEX, requiring careful planning to ensure data integrity, meet tight deadlines, and address limited resources and insufficient system documentation.

Deliverydevs assessed EFU's Oracle Forms system, developed a detailed migration plan with milestones, and deployed experts on-site to ensure a seamless transition to Oracle APEX.

Deliverydevs created a user-friendly Oracle APEX interface, incorporating business documentation and stakeholder feedback to enhance usability and ensure smooth adoption.

CASE STUDY

Adamjee Insurance Website & UI/UX Development

Adamjee's website faced issues with performance, security, user experience, and search engine rankings. Deliverydevs addressed these by optimizing responsiveness, fixing UI/UX issues, and improving site speed. We conducted thorough security assessments and analyzed traffic, providing Adamjee with valuable insights to better engage their audience.

Optimized Performance & Security: Delivered a faster, more responsive website with enhanced security using tools like JMeter, GT Metrix, and Tenable, ensuring a seamless user experience and data protection..

Data-Driven Insights & Reliable Automation: Leveraged analytics and automated testing with Selenium and JIRA to improve traffic engagement, streamline project management, and boost online conversions for Adamjee Life.

CASE STUDY

Vurke Cybersecurity & DevOps

Vurke, an emerging business, faced challenges in securing and managing its IT infrastructure during its shift to cloud-based technology. To ensure seamless operations and compliance, the company needed hybrid Active Directory integration, mobile device management, centralized security control, and alignment with ISO 27001 standards.

- ✓ Implemented a hybrid Active Directory with Microsoft Azure, configured Mobile Device Management (MDM) using Microsoft Intune, centralized system management with MSDT, and deployed updates for enhanced scalability, security, and compliance.
- ✓ Delivered BitLocker encryption with AD key management, implemented an SIEM solution for real-time threat monitoring, and guided ISO 27001 compliance to elevate Vurke's IT practices to international standards.

CASE STUDY

Fareed Logistics ERPNext Solution

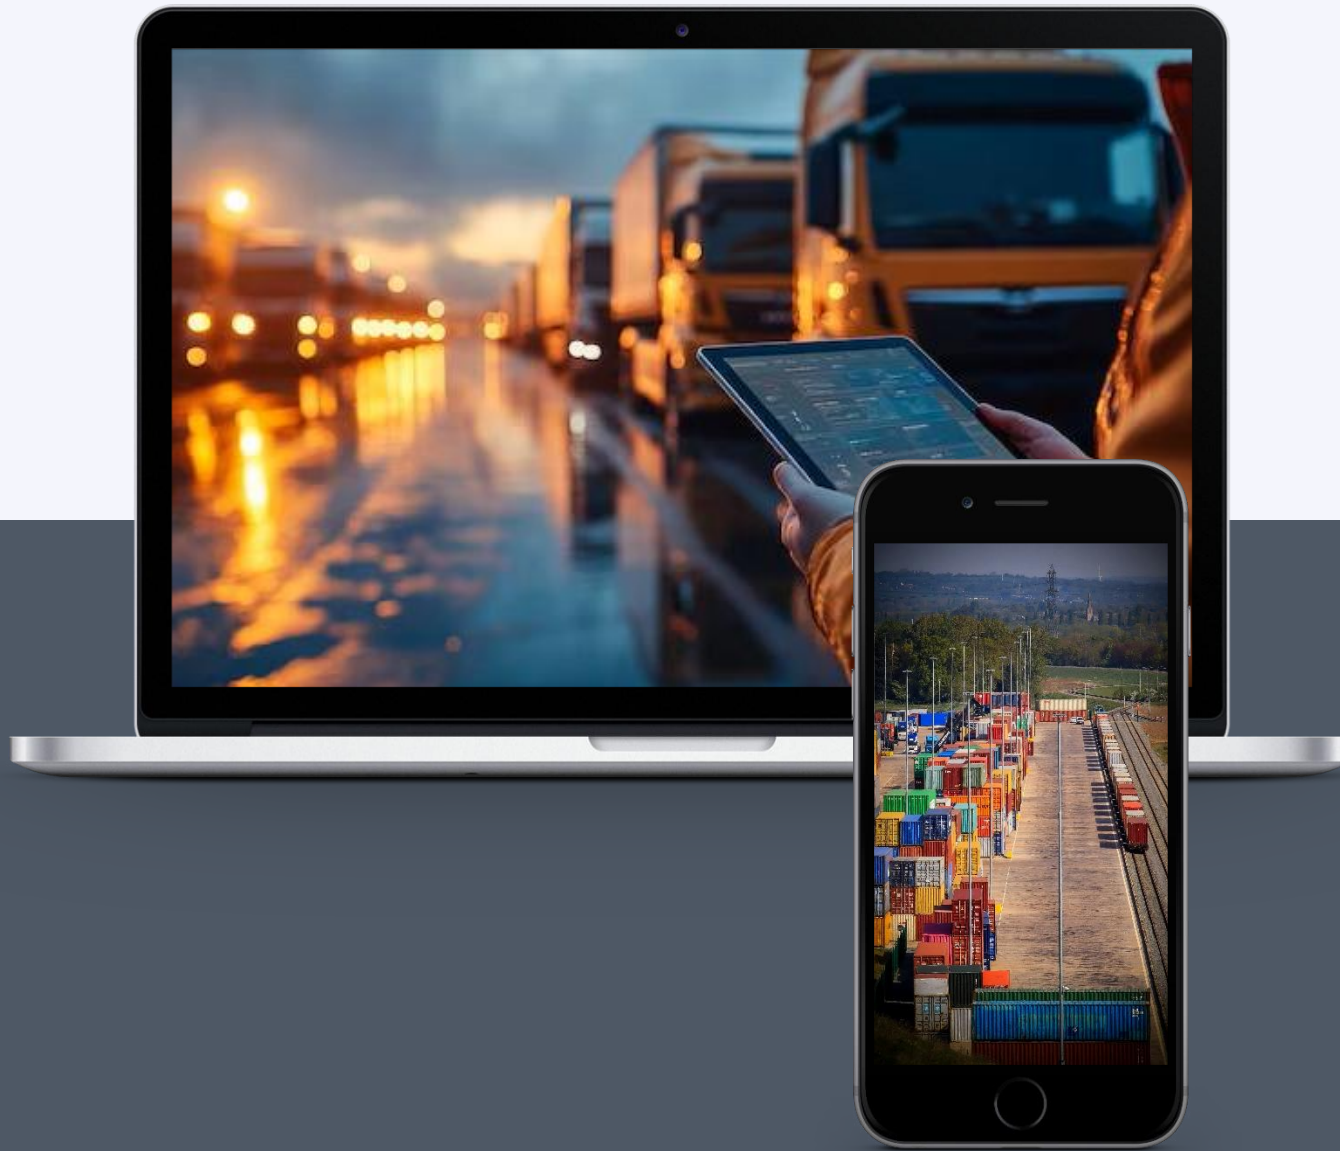

Fareed Logistics and Transport LLP is a dynamic logistics and supply chain solutions provider committed to delivering efficiency, reliability, and innovation across global and regional transportation networks.

**Challenges faced by Fareed Logistics:**

- Fragmented Data
- Manual Processes.
- Financial Inconsistencies.
- HR Inefficiencies.

**Tailored Features Implemented:**

- Custom Freight Management Module
- Integrated Customer Relationship Management
- Financial Management
- HR & Payroll
